The immutable
World Lottery

Welcome to the world lottery of the future. This is the only lottery system built directly on BSC.
Unlike traditional lotteries where players have to continuously buy tickets for every drawing, Betcoin focuses on simplicity: just acquire the token, hold it and you'll automaticly be one of the potential winners!
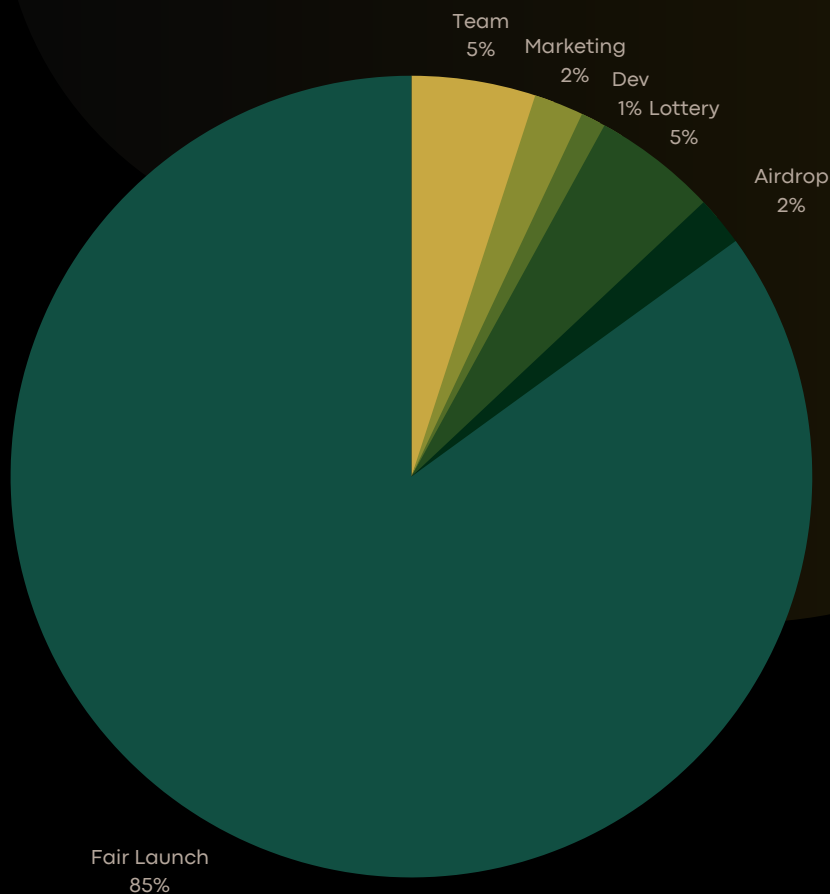

Jackpot Lottery fees will be weekly issued to a holder who holds a minimum of 100'000'000'000 $BET. The winner will not be chosen manually, but randomly selected by the contract (to avoid conflict of interests).
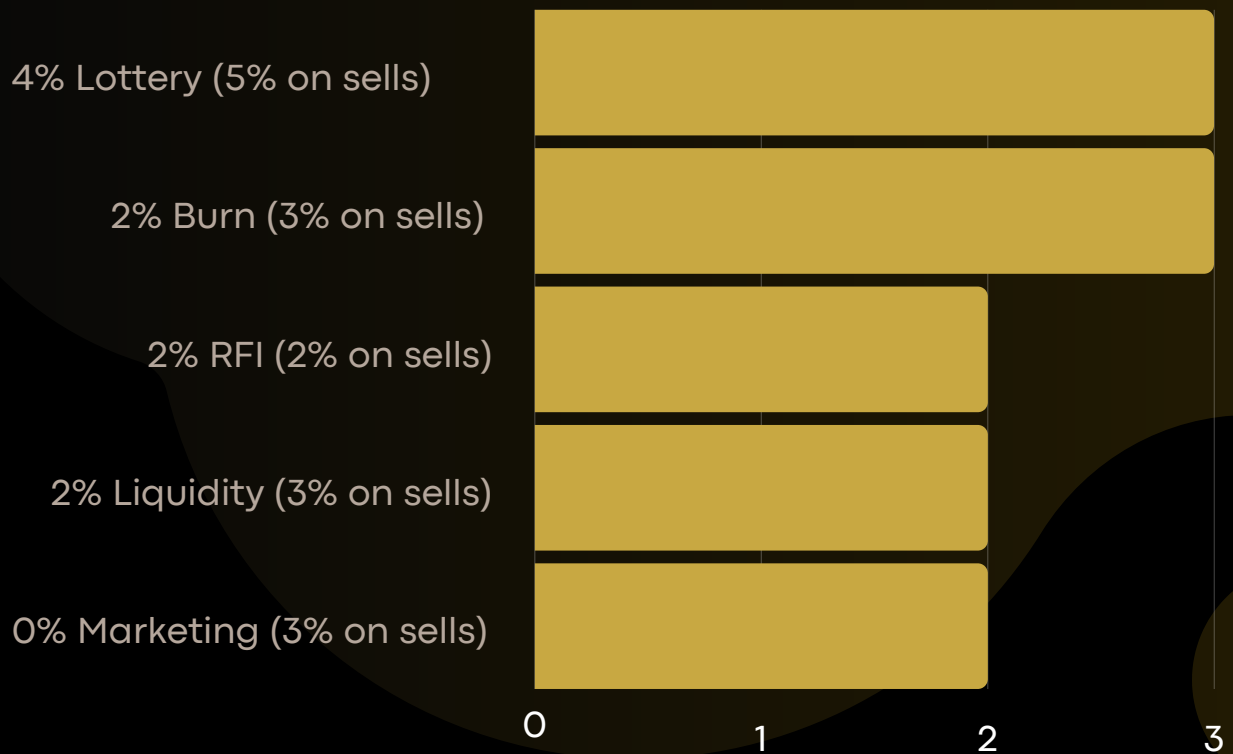

Betcoin
Allocation

Betcoin initial allocation, LP locked for 1 year
with proof link.

Feautures

Feature	Chart
4% Lottery (5% on sells)	███████████ 3
2% Burn (3% on sells)	███████████ 3
2% RFI (2% on sells)	██████ 2
2% Liquidity (3% on sells)	██████ 2
0% Marketing (3% on sells)	██████ 2

0   1   2   3

Fee system is structured by a 10% BUY fee and a 16% SELL/Transfer fee.

Frictionless Yeald Generation
Hold & Earn

RFI works by allpying a fee on each transaction and instantly redistribute it proportionally to $BET holders.

Holders don't have to stake, wait or claim their reflection. Fees are awarded by the smart contract and immidiately sent to holders balance.

Introducing our
Anti-whale System

Sometimes whales have too much power in the market, to stop this our team has developed an antiwhale system.
This system will stop whales from massive selling waves and protect $BET token from dumps.

Basically if the amount of Betcoin SOLD is greater than certain percentages of tot supply, the fees will automaticly increase according to theese levels.

SELL 1% of tot supply or more	5% extra fee
SELL 0.5% of tot supply or more	3% extra fee
SELL 0.25% of tot supply or more	1% extra fee
SELL 0.25% of tot supply	0% extra fee
